## Vertical hot water cylinders

## SWK.A

Cylinders with single heating coil, all connections at the top side only. Dedicated for installation under wall-hanged central heating boiler.

## Most important advantages

## Energy efficiency class A

SWK.A cylinder ensures highest thermal insulation class.

- heat losses are reduced up to $50 \%$ ! Comparing to efficiency class C it saves up to 320 kWh annually

## High thermal insulation and esthetics

- A class 65 mm insulation, made of polyurethane foam
- esthetic design and resistance to mechanical damage as cylinder's casing is made out of solid ABS material

## Advanced technology production

- automation provides full repeatibility of the process and high precision
- evenly applied layer of enamel with optimal thickness creates the highest quality protection against corrosion

## Unbeatable quality

- products are made of the steel grades selected by our verified suppliers
- each device undergoes leakage tests and coating checks quality control

## Dimensions

type SWK.A

## Technical data

| Type | Storage <br> capacity $(\mathrm{l})$ | Surface area of <br> coil $\left(\mathrm{m}^{2}\right)$ | Rated pressure <br> $($ storage /coil) <br> $(\mathrm{MPa})$ | Power of coil $* *$ <br> $(\mathrm{~kW})$ | Thickness / material / <br> type of insulation <br> $(\mathrm{mm}) * * *$ | Stand-by-losses <br> $(\mathrm{W}) * * * *$ | Anode type |

** Following parameters $80 / 10 / 45 \mathrm{C}$ - (heating water temp./ feed water temp./ domestic water temp.), flow rate of heating water though the coil $2,5 \mathrm{~m}^{3} / \mathrm{h}$.
*** Insulation: R- removable, NR- not removable.
